

## TCM – TELEMETRY CALIBRATION MODULE

Imes TCM is a precision Load Cell calibration and programming module specifically for Imes range of telemetry load cells, Load Links, Load Shackles and wireless devices. The device connects serially to the load cell amplifier module allowing calibration changes, setup and download of latest firmware.

### Technical specifications

Enclosure	Plastic IP54
Power	Internal 1.5V Battery
Connections	Banana connect to probe
Communication	Serial /USB
Test Capability	LE, SL, DL Wireless load cells
Menu system	Internal Load cell menu
Software	Standard PC terminal software

Connection of the simulator to the cell is made via the probe entered in the load cell battery chamber. Connection to the PC is via USB connection.

The menu is held within the firmware of the load cell device and is accessed via standard terminal software on a PC or laptop.
